Dear [Hiring Manager's Name],

I am excited to apply for the **Software Engineering Intern** position at [Company Name]. I am a Computer Science student at Georgia Institute of Technology, and I thrive in environments where I can quickly learn, adapt, and collaborate with others to solve challenging problems. With a passion for [role specific info] I enjoy not only applying my technical skills but also working alongside teammates to design creative, scalable solutions.

My experiences have consistently shown me the value of adaptability and teamwork. At **Equifax**, I worked with cross-functional teams to improve monitoring and automation pipelines, where I quickly learned new cloud technologies to deliver results under tight deadlines. In my **research at Georgia Tech**, I collaborated with peers on applying AI to genetic algorithms, navigating complex problems that required both independent initiative and group problem-solving. I also pursued the **AWS Cloud Practitioner certification** on my own, reflecting my curiosity and drive to expand my knowledge beyond the classroom.

[Switch out roles in above projects to match specific job information]

Outside of technical projects, I've contributed to the **Student Government Association IT Board**, where I work with others to maintain and secure infrastructure serving thousands of users. Whether in professional, academic, or leadership settings, I've found that the common thread in my success is not just technical ability, but being adaptable, collaborative, and motivated to keep learning.

I would love the opportunity to bring this mindset and energy to [Company Name]. Thank you for your time and consideration, and I look forward to the chance to discuss how I can contribute to your team.

Thank you,
Saahil Khanna
